A Critical Analysis of the Argumentative Theory of Reasoning:

Caveats from the Evolution of Human Communication

Flip Lijnzaad

November 11, 2024

Introduction

- Hugo Mercier and Dan Sperber
- ► Function of reasoning: not epistemic, but social
- Argumentative theory of reasoning: the function of reasoning is to produce and evaluate arguments

Mercier and Sperber (2011, p. 60)

"Reasoning has evolved and persisted mainly because it makes human communication more effective and advantageous."

Outline

- The stability of communication
- The argumentative theory of reasoning
- The evolution of human communication
- Criticizing the ATR
- Conclusions

Scott-Phillips (2008), "On the correct application of animal signalling theory to human communication"

Scott-Phillips (2008), "On the correct application of animal signalling theory to human communication"

The evolutionary arms race

insert flowchart with four steps, including epistemic vigilance (which you'll spend some extra time on

Sperber (2001), "An Evolutionary Perspective on Testimony and Argumentation" Sperber et al. (2010), "Epistemic vigilance"

Mercier and Sperber (2011)

Humans depend on cooperation; communication is crucial for this

- Humans depend on cooperation; communication is crucial for this
- Communication must be advantageous for both senders and receivers

- Humans depend on cooperation; communication is crucial for this
- Communication must be advantageous for both senders and receivers
- It is advantageous to deceive, and disadvantageous to be deceived

- Humans depend on cooperation; communication is crucial for this
- 2 Communication must be advantageous for both senders and receivers
- It is advantageous to deceive, and disadvantageous to be deceived
- Receivers exercise epistemic vigilance

- Humans depend on cooperation; communication is crucial for this
- 2 Communication must be advantageous for both senders and receivers
- It is advantageous to deceive, and disadvantageous to be deceived
- Receivers exercise epistemic vigilance
- Senders produce arguments

- 1 Humans depend on cooperation; communication is crucial for this
- 2 Communication must be advantageous for both senders and receivers
- It is advantageous to deceive, and disadvantageous to be deceived
- Receivers exercise epistemic vigilance
- Senders produce arguments
- ▶ Production and evaluation of arguments is facilitated by reasoning

Mercier and Sperber (2011)

- Humans depend on cooperation; communication is crucial for this
- 2 Communication must be advantageous for both senders and receivers
- It is advantageous to deceive, and disadvantageous to be deceived
- Receivers exercise epistemic vigilance
- Senders produce arguments
- Production and evaluation of arguments is facilitated by reasoning

reasoning

Mercier and Sperber (2011)

- 1 Humans depend on cooperation; communication is crucial for this
- 2 Communication must be advantageous for both senders and receivers
- It is advantageous to deceive, and disadvantageous to be deceived
- Receivers exercise epistemic vigilance
- Senders produce arguments
- Production and evaluation of arguments is facilitated by reasoning

reasoning → argumentation

Mercier and Sperber (2011)

- Humans depend on cooperation; communication is crucial for this
- 2 Communication must be advantageous for both senders and receivers
- It is advantageous to deceive, and disadvantageous to be deceived
- Receivers exercise epistemic vigilance
- Senders produce arguments
- Production and evaluation of arguments is facilitated by reasoning

reasoning \rightarrow argumentation \rightarrow communication

Mercier and Sperber (2011)

- 1 Humans depend on cooperation; communication is crucial for this
- 2 Communication must be advantageous for both senders and receivers
- It is advantageous to deceive, and disadvantageous to be deceived
- Receivers exercise epistemic vigilance
- Senders produce arguments
- Production and evaluation of arguments is facilitated by reasoning

reasoning \rightarrow argumentation \rightarrow communication \rightarrow cooperation

Mercier and Sperber (2011)

- 1 Humans depend on cooperation; communication is crucial for this
- 2 Communication must be advantageous for both senders and receivers
- It is advantageous to deceive, and disadvantageous to be deceived
- Receivers exercise epistemic vigilance
- Senders produce arguments
- Production and evaluation of arguments is facilitated by reasoning

reasoning \rightarrow argumentation \rightarrow communication \rightarrow cooperation \rightarrow survival

The evolution of human communication

Criticizing the ATR

Conclusions

- ► Intuitively attractive idea
- ► Theory is not cutting it
